DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the features set forth in claims 41 and 42 must be shown or the feature(s) canceled from the claim(s). More specifically, applicant should provide drawings which illustrate what is pushed and popped from the stacks, and more specifically, show the timing of the pushes and pops (pushing to a first stack in response to predicting call instructions have been fetched, pushing to a second stack in response to decoding call instructions, popping from the first stack in response to predicting return instructions have been fetched, popping from the second stack in response to decoding return instructions, comparing return addresses prior to executing return instructions, etc.). The examiner has been unable to find such features illustrated in the drawings. No new matter should be entered.

In addition, the examiner would like applicant to verify that bus 356 in Fig. 4 should not be coupled to another component. More specifically, the left portion of bus 356 includes a hanging wire and the examiner wanted to inform applicant so that it may be fixed if necessary. If the wire does not need to be coupled to another component, then the hanging portion should be eliminated for clarity.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure

number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency.

Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Conclusion

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
